Account Details:

The Clean Air Account No. 151 is a General Revenue-Dedicated account created by Senate Bill 2, Seventy-second Legislature, First Called Session, 1991. Account No. 151 was established to receive Clean Air Act fees which are used to safeguard the air resources of the state, recover the costs of permitting new or modified emission sources, and recover the costs of permit review and renewal.

Allowable uses of the account include: 1. the development and administration of the federal air permitting program under Titles IV and V of the Federal Clean Air Act; 2. the Vehicle Emissions Inspection and Maintenance program (VEIMP); and 3. the Low-Income Vehicle Repair Assistance, Retrofit and Accelerated Vehicle Retirement Program (LIRAP).

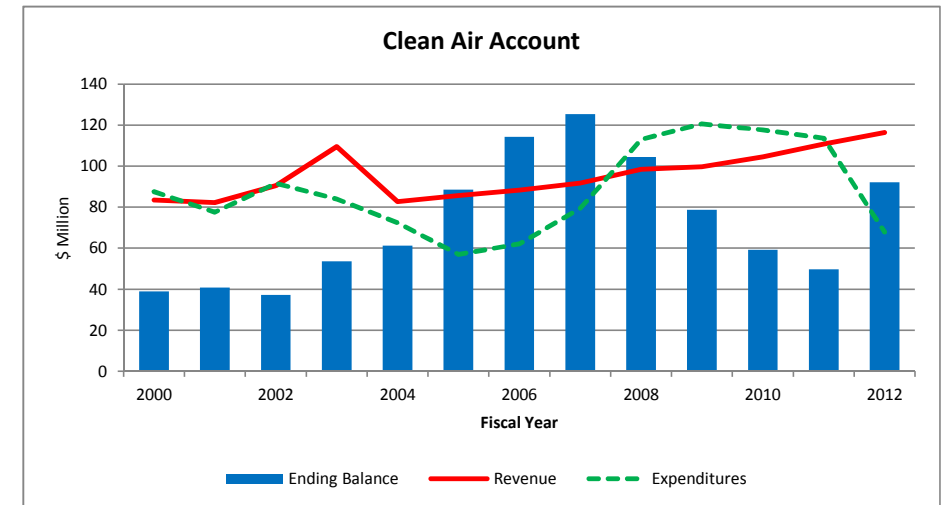

Funds deposited in the Clean Air Account No. 151 come from a variety of permits and fees, with the largest portion from the motor vehicle safety inspection fee. This fee accounted for \$165.5 million or 81.4 percent of the receipts estimated to be deposited into the account in the 2012-13 biennium. Revenue from air permits, renewals and inspections (i.e., air pollution control fees) make up the remainder of receipts into the Account.
